

Fleet Emissions Monitoring Statement (Third-Party Logistics)

Teek It Ltd does not own or operate a vehicle fleet.

Fleet-related emissions are generated through the use of third-party logistics providers and are managed as Scope 3 emissions in line with the Greenhouse Gas Protocol and the company's Carbon Reduction Plan (PPN 06/21).

Teek It Ltd monitors fleet-related emissions on a proportionate basis through:

- Review of delivery methods and logistics arrangements used by third-party providers.
- Use of low-emission and electric vehicle delivery services where available, including integration with Stuart, which operates a 100% electric delivery fleet in applicable locations.
- Use of reasonable estimates and supplier information to assess transport-related emissions.
- Periodic review of logistics partners and delivery practices to identify opportunities to reduce emissions.

Fleet emissions data and assumptions are reviewed periodically and updated where there are material changes to suppliers, delivery volumes or operating practices.

Responsibility for monitoring fleet emissions rests with the Managing Director.
